## **“Knit one, purl one” on a STOLL CMS 520 C+ multi gauge machine**

STOLL has expanded its gauge range further, adding 1.5gg and 2.2gg for the extra-bulky knits and extra-chunky yarns that previously demanded hand knitting. Gauge scalability now extends stitch optics from 1.5gg to 5gg; yarns down to 0.7 Nm can be used.

Moreover, the industrial knitting machine offers countless design options: jacquard, intarsia and structured knits - combined with shaping attributes in Fully Fashion technique. The design applications reflect urbane lifestyle and extend far beyond apparel. From accessories to interior design, the sky's the limit.

Discover STOLL's world of technical possibilities and unleash your creativity!

**STOLL-MULTI GAUGES®**

- Fully Fashion slipover in boyfriend look with curled seams
- Front: 4-colour float thread transfer structure with cast-off
- Back: jersey with all needles

## The Details

1510058 - Page 6/7/8

### College jacket

At first glance, this design impresses with its airy, bulky texture. It seems as if chunky yarns have been hand-stitched to a knitwear jacket. In fact, the texture consists of a large tuck transfer structure built on a finer intarsia foundation. This jacket is light as a feather, with the large stitches creating generous volume.

1510050 - Page 17

**Long waistcoat**

The most distinctive feature of this long waistcoat is a nuanced combination of ultra-large and finer stitches. They are split into intarsia fields of different colours. The pattern is designed such that the entire waistcoat is knitted in one piece. Armholes, pockets and seams are all joined in the machine. This eye-catching design makes a modern impression with its airy hand-knit look.

1510063 - Page 18/19

**Macramé top**

This macramé-inspired top is ready-made across the knitting direction and features a side seam, seen here at the right. The pattern includes neck and armholes pre-fabricated in the machine, as well as more tightly knit side sections for a corset-like effect. The moving wave structure of the knit is achieved by using gore technique and combining structures. The fringes at the bottom edge show just how chunky the yarns are.
